ELEGANT BY NATURE,

Perfected For Modern Interiors.

Formé Collection x 1200x1800mm
9mm Thickness

The
STORY
Behind Us

The strength and success of Sperita Granito lie in its sound infrastructure which has advanced manufacturing facilities that comprise the latest machinery and advent-grade technologies. The ultra-modern plant supported and run by technically sound staff ensures that Sperita Granito is indeed matchless when it comes to ceramic tilling solutions.

Sperita Granito has developed in leaps and bounds by getting into the greater pool of technology, by adopting italian technology which has benefitted customers in all arenas since factors like optimization, calibrations, sizing, and designing is taken great care off.

Technology providers in the ceramics field who realized the potential & sincerity of the company preferentially offered us and distributors the best support to strengthen individual positions in our respective markets.

The First Touch

Before a surface becomes a design, it becomes an experience.

There is something timeless about the way our hands connect with stone. Every subtle movement across its surface reveals a different texture, a different character and a different story. It is this sense of touch that inspires us to create surfaces that are not only beautiful to look at, but meaningful to experience.

Crafted By Hand. Defined By Detail.

True craftsmanship begins where ordinary ends.

Behind every beautiful surface is patience, precision and an unwavering respect for the material. From the first mark to the finest detail, every process is guided by skilled craftsmanship. Because creating exceptional surfaces is not simply about making a product – it is about preserving the character of the material.

Beauty In Every Imperfection

Nature never creates two surfaces exactly alike.

Veins, textures, shadows and subtle variations come together to create a character that cannot be replicated. We find inspiration in these natural imperfections, studying every detail to capture the authentic beauty of stone and transform it into refined surface designs.

From The Earth To Your Space

A journey that begins in nature and ends in architecture.

Every slab carries the memory of where it came from – its texture, movement, depth and character. Carefully selected and refined for contemporary spaces, these surfaces bring together the raw strength of nature and the sophistication of modern design.

Because when nature meets craftsmanship, a surface becomes more than material. It becomes a statement.

CRAFTED AT LARGE SCALE.

1200x 1800MM

Advanced surfaces. Distinctive applications.

Engineered for spaces that demand scale, precision, and visual continuity, these large-format surfaces bring together advanced manufacturing and refined design. The 1200 × 1800mm format offers generous proportions with a clean, expansive appearance, allowing fewer visual interruptions and greater freedom across walls, floors, countertops, and architectural applications. Every slab is developed with careful attention to surface character, dimensional consistency, and finish, creating a versatile solution for contemporary interiors where material presence and performance work seamlessly together.

www.sperita.in

ENGINEERED FOR EVERYDAY EXCELLENCE

Developed to bring together refined aesthetics, dependable performance, and advanced surface technology. The 1200 × 1800mm format offers generous proportions for seamless applications, while its carefully engineered construction delivers durability across demanding interior environments. From visual appeal to functional performance, every detail is designed to create surfaces that perform beautifully and consistently.

1200X 1800MM

9MM THICKNESS

TECHNICAL ADVANTAGE

DESIGNED FOR DIVERSE SPACES

From intimate residential settings to high-traffic commercial environments, these surfaces adapt effortlessly to different architectural applications. Their expansive format and refined finish create visual continuity across interiors, offering designers greater freedom to shape spaces with a cohesive material language.

BRILLIANCE, **REFINED** TO PERFECTION

The Art Of surface

Every surface carries its own visual language, defined by the subtle relationship between texture, tone, movement, and light. Thoughtfully developed patterns and carefully balanced finishes bring depth to the material, allowing each detail to reveal a distinctive sense of character.

More than a finishing element, the surface becomes an integral part of the space—adding visual continuity, material richness, and a refined presence across walls, floors, furniture, and other contemporary applications.

Feather Touch

Artistry, **Mastered** In Every Detail

The Canvas of Architecture

Every great architectural marvel begins with a vision and the precise materials to bring it to life. At Feather Touch, we believe the surfaces you choose form the true foundation of your design narrative. Our premium collections are meticulously crafted to blend seamless, elegant aesthetics with uncompromising durability.

Transforming empty spaces into expressive environments requires an expansive palette of textures and finishes. We provide architects and visionary designers with the ultimate canvas for their creativity. Whether designing a modern commercial hub or a quiet residential sanctuary, our innovative materials elevate every structural detail into a masterful work of art.
